

Resumen de convocatorias internacionales encontradas en SPIN entre el 11 y el 25 de junio del 2019.

Contenido

Synthetic Biology for Engineering Applications (Human HealthR01)	1
Bursary Program - ornithological research.....	2
Country Health Information Systems and Data Use (CHISU)	2
Event Support Grant – Meeting (applied microbiology)	2
International Fund for Sexual Minorities	3
Investigator Awards in Humanities and Social Science	3
Monographs Programme (unpublished Works in humanities and social sciences)	3
Seabird Conservation Program	3
Short-Term Fellowships (visits to laboratorios in Europe and rest of the world, molecular biology).....	4
Small-Scale Events Advancing SPSSI (SEAS) Grants (events for study of social issues).....	4
Strengthening the HIV Pre-Exposure Prophylaxis (PrEP) Care Continuum through Behavioral, Social, and Implementation Science (R01 Clinical Trial Optional)	4
Creating Hope in Conflict: A Humanitarian Grand Challenge Request for Proposals	5

Synthetic Biology for Engineering Applications (Human HealthR01)

Synopsis

National Institutes of Health (NIH) and its participating Institutes and Centers invite applications for research to advance the understanding and application of synthetic biology for human health. It will support 1) the development of innovative tools and technologies in synthetic biology and 2) their application in biomedical research and human health. An integrative research plan based on collaborations of synthetic biologists with computational scientists, cell biologists, engineers, and/or physician scientists is strongly recommended. Early Stage Investigators in Synthetic Biology are especially encouraged to apply. This FOA will use the NIH Research Project (R01) award mechanism. Synthetic biology tools to assemble biosynthetic machinery and optimize yield for plant based natural products into heterologous hosts.

Bursary Program - ornithological research

The Eric Hosking Trust are awards bursaries of up to £750 to support natural history and ornithological research through the media of writing, photography, painting or illustration.

Program Objectives

The Trust bursaries are to be awarded annually to applicants requiring financial assistance, in order to pursue projects on Birds and other Natural History subjects, which are of scientific and conservation value, through the media of writing, photography, painting or illustration.

Hosking (Eric) Charitable Trust

953 USD

Country Health Information Systems and Data Use (CHISU)

Synopsis

The purpose of this RFI is to solicit input from organizations that have knowledge and experience in providing technical assistance to improve country health information systems, both paper and digital in LMICs. We are seeking to gather information about the global community's capabilities to work on specific areas of health information systems development and improvement of the use of such data for decision making to improve health outcomes. USAID is also interested in understanding the challenges faced in measuring and monitoring the impact of improved health information systems at the country level.

Program Objectives

The priority areas of inquiry include the following: Measuring change , Local Institutions, strengthened host-country governance of health information systems and the enabling environment; Increased availability and quality of health data and information; Health data and information used for decision making to address health priorities, gaps and challenges at national and sub-national levels; and enhanced capacity of local partners to promote data used for decision-making

Event Support Grant – Meeting (applied microbiology)

Synopsis

The Event Support Grant is available to Full, ECS, International or Life Members wanting financial support for an applied microbiology meeting, symposium or practical workshop. These meetings may be organized by local or national groups with a special interest in applied microbiology. The maximum award is £2000.

Program Objectives

The grant is aimed at supporting the promotion of the science of applied microbiology at a local level as well as providing a networking opportunity for established scientists and students working in applied microbiology

Society for Applied Microbiology

2,540 USD

International Fund for Sexual Minorities

Synopsis

Astraea Lesbian Foundation for Justice works for social, racial and economic justice in the U.S. and internationally. Our grantmaking and philanthropic advocacy programs help lesbians, transgender people and allied communities challenge oppression and claim their human rights.

Program Objectives

Astraea Lesbian Foundation for Justice

10,000 USD

<https://spin.infoedglobal.com/Program/Detail/068578>

Investigator Awards in Humanities and Social Science

Synopsis

Investigator Awards enable humanities and social science researchers with a compelling research vision to tackle the most significant questions in human health. Researchers can apply for an Investigator Award if they are a humanities or social science researcher with a compelling vision who wants to tackle a significant question about human health.

Program Objectives

Investigator Awards enable humanities and social science researchers with a compelling research vision to tackle the most significant questions in human health.

Wellcome Trust

1,270,000 USD

Monographs Programme (unpublished Works in humanities and social sciences)

Synopsis

The Foundation for Polish Science provides funding for the publication of original and previously unpublished works in the humanities and social sciences selected by competition.

Program Objectives

Works may be submitted for the competition by the author of works in the humanities and social sciences written in Polish.

Foundation for Polish Science

Seabird Conservation Program

Synopsis

The National Fish and Wildlife Foundation (NFWF) has issued a request for proposals through their Seabird Conservation Program with a focus on several geographies within the Pacific, including the following priority regions: Alaska, Chile, California Current (including Mexico), Hawaii and US overseas lands and territories in the Pacific. This request for proposals will award approximately \$3,500,000 in funding support for Pacific seabird conservation efforts in 2019.

Short-Term Fellowships (visits to laboratories in Europe and rest of the world, molecular biology)

Synopsis

EMBO provides Short-Term Fellowships to fund research visits of up to three months to laboratories in Europe and elsewhere in the world.

Program Objectives

Short-Term Fellowships fund research exchanges of up to three months between laboratories in eligible countries. The aim is to facilitate valuable collaborations with research groups applying techniques that are unavailable in the applicant's laboratory. Short-Term Fellowships are not awarded for exchanges between two laboratories within the same country. Short-Term Fellowships are intended for joint research work rather than consultations. The fellowships cover travel plus subsistence of the fellow only and not of dependents.

Small-Scale Events Advancing SPSSI (SEAS) Grants (events for study of social issues).

Synopsis

SPSSI SEAS grants are intended to promote awareness of SPSSI, to identify potential new members, and to promote SPSSI membership.

Program Objectives

SPSSI SEAS grants support: Small-scale events hosted at a member's institution or other local venue related to the psychological study of social issues. These events may include, but are not limited to, departmental or institutional speakers or speaker series, research symposia, brown-bag events or series, or mini-conferences; and Initiatives that enhance SPSSI membership through the creation of researcher links, networks, and other collaborative opportunities, including building connections among early career, graduate student, new, and established members.

Society for the Psychological Study of Social Issues

1,000 USD

Strengthening the HIV Pre-Exposure Prophylaxis (PrEP) Care Continuum through Behavioral, Social, and Implementation Science (R01 Clinical Trial Optional)

Synopsis

National Institute of Mental Health (NIMH) invites applications for behavioral, social, and implementation science research designed to (a) identify gaps in the HIV pre-exposure prophylaxis (PrEP) care continuum and associated determinants; (b) develop and test interventions to strengthen PrEP delivery, use, and outcomes; and (c) reduce racial/ethnic and age-related disparities in PrEP uptake and use. This FOA will use the NIH Research Project (R01) award mechanism.

Program Objectives

The following research is needed: (1) behavioral, social, and implementation science research to identify potential gaps and challenges in the PrEP care continuum and associated determinants, (2) development

and testing of innovative interventions to improve PrEP awareness, screening, engagement, retention, adherence, and persistence among individuals at substantial risk for HIV infection, and (3) basic behavioral, social, and implementation science research to better understand and reduce racial/ethnic and age-related disparities in PrEP uptake and use.

Although the primary focus of this science is oral PrEP that is currently available for prescription, National Institute of Mental Health/NIH/DHHS

Creating Hope in Conflict: A Humanitarian Grand Challenge Request for Proposals

Synopsis

The second round of Creating Hope in Conflict: A Humanitarian Grand Challenge will close on Tuesday, July 16, 2019. The goal is to find and accelerate life-saving or life-improving innovations to help the most vulnerable and hardest-to-reach people impacted by humanitarian crises caused by conflict. Funding worth \$250,000 for seed innovations, and up to \$1,000,000 for Transition To Scale innovations will be provided. Innovations to help conflict-affected people, that provide, supply, or locally generate: safe water and sanitation; energy; life-saving information; and/or, health services and supplies are sought.

Projects are expected to take an Integrated Innovation approach, defined as the coordinated application of scientific/technological, social and business innovation, to develop solutions to complex challenges. This approach does not discount the singular benefits of each of these types of innovation alone, but rather highlights the powerful synergies that can be realized by aligning all three.

Key focus areas include: Safe Water and Sanitation; Energy: Life-Saving Information; Health Products and Services.
